dotvet

dotvet

Your complete veterinary practice management solution

- ✓ **Designed by vets for vets**
- 👤 **Flexible licensing & user controls**
- 🔧 **Remote access & easy-to-use tools**
- 🔗 **Workflow based solution**

What can DotVet do for you?

DotVet gives the control of your Practice Management System back to you. All the features are configurable by you in the system administration screen, so you decide who can access which parts of the system and what rights they have.

DotVet aims to increase client retention and maximise your profits. Its unique functionality avoids missing consultation fees and encourages Vets to suggest another appointment date before the client leaves the consulting room.

DotVet has been developed in partnership with working vets who have longer experience of veterinary computing than anyone else in the industry. It utilises the very latest programming tools available.

DotVet brings together experienced veterinary practitioners and a software development company to ensure we respond rapidly to requests for new features.

www.dotvet.co.uk

Clients and animals
Full control over client records allowing rapid registration of new clients whilst on the phone or self registration and appointment booking through integrated online system with automated SMS reminders.

Staff Management - Set up consulting, visit and ops rotas
Configurable staff rota system showing employee's availability for work, holidays and CPD, linked to the client appointment diary. Set appointments for the branch or by consults. Trackable for Management Index reports.

Hospitalisation
Hospital cage booking prevents double or over booking and ensures maximum facility usage. Portable tablet based in ward reminder, recording and billing facility.

Referral work
Special features help with recording cases referred into or out of your practice.

Stock Management - Automatically buy at the best price
Comprehensive stock control allowing simple inter branch transfer before ordering from the preferred or best value supplier. Monitored stock wastage and disposal.

Task Management
Allocate tasks to individuals or groups or by branch or practice for immediate or future action. Display calls and follow ups due in one place. Tasks are linked to the client and animal and are constantly trackable.
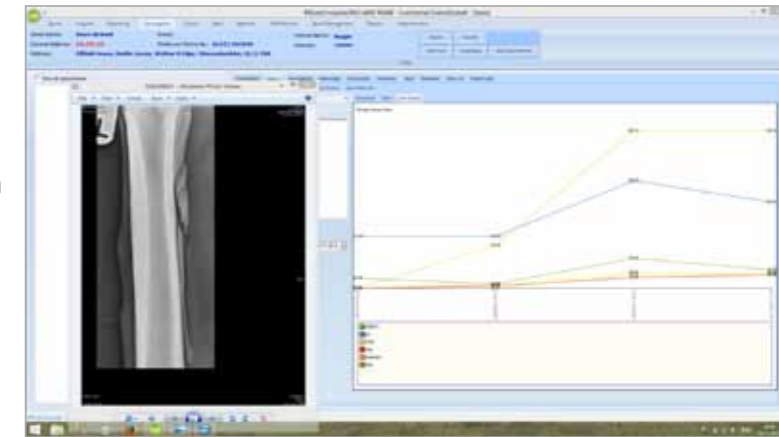

Lab Reports and Radiographs
These are stored within the system, dicom images and selected web pages are also accessible for display within DotVet.

Cost of Ownership.
Intuitive screens reduce the training costs and you can install DotVet on as many computers as you like and pay only for those in use. DotVet automatically updates with the latest version when required.

Data Security.
We take system security very seriously. Whether your system is cloud based, in our privately owned Data Centre or on a server in your practice there are multiple hardware and software security layers protecting your valuable data.

- ● **Clients can book online direct to your diary via your own website**
- ● **Automatic client communication using SMS and email**
- ● **Reduce administration with integrated diary and rota**
- ● **Powerful flexible reporting with graphical lab reports**
- ● **Portable tablet system for use within hospital wards**
